EDUCATION

University of Southern California

Aug 2025 – May 2027

Master of Science in Computer Science (AI)

Los Angeles, CA

- GPA: 4.0/4.0
- Viterbi Graduate Scholarship: Merit-based award for academic year 2025–26
- Aga Khan Foundation International Scholarship: Prestigious global award for master's studies at USC

National University of Computer and Emerging Sciences

Aug 2019 – Jun 2023

Bachelor of Science in Computer Science

Pakistan

- GPA: 3.95/4.0
- Rector's List (5x): Awarded for achieving a perfect semester GPA of 4.0/4.0 across five semesters

EXPERIENCE

Software Engineer Intern, Content Classification Team

Jun 2026 – Aug 2026

Veeam

San Jose, California

- Evaluated and prototyped full-text indexing in Databricks, improving search performance for large-scale string queries
- Conducted a comparative analysis of LanceDB, Elasticsearch, and OpenSearch for vector search workloads, identifying an architecture that separates storage from compute and can reduce compute costs by up to 60%

Software Engineer Intern, Informatics Team

Dec 2025 – Present

USC Alzheimer's Therapeutic Research Institute (ATRI)

San Diego, California

- Built a unified data aggregation layer across multiple recording runs, instruments, and specimen types, reducing manual analysis effort for researchers by 30%+
- Implemented fine-grained RBAC and a centralized permission matrix across backend and frontend, enabling secure and role-based access
- Developed 15+ Django REST APIs and built frontend components using TypeScript, improving data access and visualization for research workflows

Software Engineer II

Jun 2023 – Aug 2025

Securiti AI

Pakistan

- Architected and optimized Go-based RESTful microservices powering enterprise data privacy workflows handling datasets exceeding 15M+ files, reducing API latency by 15% in production environments
- Designed and deployed asynchronous processing pipelines and scalable background workers, increasing large-scale data export and classification throughput by 40%
- Built the Validation Workbench and agentic AI automation system for classifier tuning, improving classification accuracy and reducing manual configuration effort
- Integrated structured error logging and Slack-based pipeline alerts, reducing incident response time by 30%
- Containerized CI/CD pipelines using Jenkins and Docker across 10+ services, reducing deployment time by 35%
- Built unit, performance, and integration tests, reducing production bugs by 25% and ensuring stable deployments

PROJECTS

Dense Video Captioning (Research Paper)

Aug 2022 – May 2023

- Engineered an end-to-end dense video captioning pipeline using Python, OpenCV, and PyTorch, performing temporal activity segmentation and generating timestamp-aligned captions
- Trained and optimized a transformer-based sequence-to-sequence model with temporal attention, improving BLEU score by 12% and increasing event description accuracy

Khudmadad Freelancing Platform (GitHub)

Jan 2022 – May 2022

- Built a production-ready freelancing web app using .NET backend (C#), React frontend, and PostgreSQL
- Implemented secure RESTful APIs, RBAC, and real-time messaging for seamless interaction
- Published plugin to websites gaining 2K+ downloads and an average 4/5-star review

TECHNICAL SKILLS

Languages: Python, Go, Java, C++, C, C#, JavaScript, TypeScript, HTML/CSS

Frameworks: FastAPI, Flask, ASP.NET, .NET Core, Node.js, React.js

Databases: PostgreSQL, MySQL, Elasticsearch, MongoDB, NeptuneDB

Developer Tools: Docker, Kubernetes, AWS, Azure, Jenkins, CI/CD, Git

Testing & AI Libraries: PyTorch, TensorFlow, NumPy, Pandas, Playwright, Cypress, PyTest, Postman
